NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS
For the three months ended February 28, 2026 and 2025
(Expressed in Canadian dollars)

1. NATURE OF BUSINESS AND GOING CONCERN

Entheon Biomedical Corp. ("Entheon") or ("the Company") was incorporated on April 6, 2010 under the Canadian Business Corporations Act and maintains its head office at Suite 720, 999 West Broadway, Vancouver, British Columbia, Canada, V5Z 1K5 and registered office at 10th Floor, 595 Howe Street, Vancouver, British Columbia, Canada, V6C 2T5. The Company is traded on the Canadian Securities Exchange ("CSE") under symbol ENBI.

These unaudited condensed interim consolidated financial statements are prepared on a going concern basis, which contemplates that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of business. At present, the Company's operations do not generate sufficient cash flow. The Company has incurred losses since inception and had an accumulated deficit of \$20,408,574 as at February 28, 2026 (November 30, 2025 - \$20,875,181). In order to continue as a going concern and meet its corporate objectives, the Company will require additional financing through debt or equity issuances or other available means. Although the Company has been successful in the past in obtaining financing, there is no assurance that the Company will be able to obtain adequate financing in the future or that such financing will be on terms advantageous to the Company. The above factors indicate that material uncertainty exists that cast significant doubt on the Company's ability to continue as a going concern. Should the Company identify a suitable asset or business acquisition, it would be required to raise additional capital to finance the transaction.

These unaudited condensed interim consolidated financial statements do not include adjustments that would be required if the going concern assumption is not an appropriate basis for preparation of the condensed interim consolidated financial statements. These adjustments could be material.

These unaudited condensed interim consolidated financial statements were authorized for issue on April 1, 2026, by the directors of the Company.

2. BASIS OF PREPARATION

These unaudited condensed interim consolidated financial statements have been prepared in accordance with IFRS Accounting Standards, as issued by the International Accounting Standards Board ("IASB") and Interpretations of the International Financial Reporting Interpretations Committee ("IFRIC") which the Canadian Accounting Standards Board has approved for incorporation into Part 1 of the Handbook of Chartered Professional Accountants of Canada applicable to the preparation of interim financial statements, including International Accounting Standard ("IAS") 34, Interim Financial Reporting. These condensed interim consolidated financial statements do not include all the information and disclosures required in the annual financial statements and should be read in conjunction with the Company's annual financial statements as at and for the year ended November 30, 2025 and 2024. In particular, the Company's significant accounting policies were summarized in Note 2 of the consolidated financial statements for the year ended November 30, 2025, and have been consistently applied in the preparation of these condensed interim consolidated financial statements. These unaudited condensed interim consolidated financial statements were prepared on a going concern basis.

3. CAPITAL MANAGEMENT

The Company's objectives when managing capital are to safeguard the Company's ability to continue as a going concern.

The Company sets the amount of capital in proportion to risk. The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. In order to maintain or adjust the capital structure, the Company may issue new common shares, sell assets, reduce debt or increase its debt. The capital of the Company comprises the shareholders' equity. The Company is not subject to any externally imposed capital requirements.

Financial instruments are classified into one of the following categories: FVTPL, FVTOCI, or amortized cost. The carrying values of the Company's financial instruments are classified into the following categories:

Accounts payable	Amortized cost	59,824	2,201

IFRS 9 Financial Instruments: Disclosures establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value as follows:

6. FINANCIAL INSTRUMENTS (continued)

Financial instrument risk exposure

The Company's financial instruments are exposed to certain financial risks, including credit risk, liquidity risk, and market risk.

(a) Credit Risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company has exposure to credit risk through its cash and cash equivalents. The Company manages credit risk, in respect of cash, by maintaining the majority of cash at highly rated financial institutions.

The Company's maximum exposure to credit risk at the end of any period is equal to the carrying amount of these financial assets as recorded in the statement of financial position. At February 28, 2026 and December 31, 2025, no amounts were held as collateral.

(b) Liquidity Risk

Liquidity risk is the risk that the Company will encounter difficulty in satisfying financial obligations as they become due. The Company manages its liquidity risk by forecasting cash flows required by its operating, investing and financing activities. The Company had cash and equivalents at February 28, 2026, in the amount of \$267,598 and working capital of \$219,307 in order to meet short-term business requirements. Accounts payable have contractual maturities of approximately 30 to 90 days or are due on demand and are subject to normal trade terms.

The maturity profiles of the Company's contractual obligations and commitments as at February 28, 2026, are summarized as follows:

	Total	Less Than 1 Year	1-5 Years	More Than 5 Years
Accounts payable	\$ 59,824	\$ 59,824	\$ -	\$ -
Total	\$ 59,824	\$ 59,824	\$ -	\$ -

(c) Market Risk

Market risk consists of interest rate risk, foreign currency risk and price risk. These are discussed further below.

Interest Rate Risk

Interest rate risk consists of two components:

- (i) To the extent that payments made or received on the Company's monetary assets and liabilities are affected by changes in the prevailing market interest rates, the Company is exposed to interest rate cash flow risk.
- (ii) To the extent that changes in prevailing market rates differ from the interest rates on the Company's monetary assets and liabilities, the Company is exposed to interest rate price risk.

In management's opinion, the Company is not exposed to significant interest rate risk as the risk is primarily on cash and cash equivalents.

6. FINANCIAL INSTRUMENTS (continued)

Foreign Currency Risk

Foreign currency risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in foreign exchange rates. The Company is not subject to significant foreign exchange risk.

Price Risk

Price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk or foreign currency risk.

The Company is exposed not exposed to any significant price risk.
