Notes to the Condensed Interim Financial Statements

For the six and three months ended February 28, 2026 and 2025

(Unaudited - Expressed in Canadian dollars – unless otherwise noted)

1. NATURE OF OPERATIONS AND GOING CONCERN

Antimony Resources Corp. (formerly Big Red Mining Corp.) (the “Company”) is in the business of the exploration and evaluation of mineral properties. The Company was incorporated under the Business Corporations Act of British Columbia on October 18, 2020. The address of the Company's registered and records office and principal place of business is Suite 100, 17565 58 Avenue, Surrey, British Columbia, V3S 4E3 Canada. In March 2025, the Company's name changed from Big Red Mining Corp. to Antimony Resources Corp., and the Company's common shares commenced trading on the CSE under the new name and under the new trading symbol "ATMY".

The Company's primary business is the acquisition and exploration of mineral properties. The Company's exploration and evaluation asset (Note 5) has shown antimony deposits, however given the high degree of risk involved, can there be any assurance that its exploration activities will result in the definition of such deposits being located or, ultimately, a profitable mining operation in the future.

These financial statements (the “financial statements”) have been prepared on a going concern basis, which assumes the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities and commitments in the normal course of business. The Company incurred a loss of \$10,733,754 during the six months ended February 28, 2026, and has an accumulated deficit as at February 28, 2026 of \$14,711,130 (August 31, 2025 - \$4,377,376). Further, the Company has no source of operating cash flows, and there is no assurance that sufficient funding (including adequate financing) will be available to conduct required exploration and development of its mineral property projects. These factors indicate that a material uncertainty exists that may cast significant doubt on the Company's ability to continue as a going concern.

The application of the going concern concept is dependent upon the Company's ability to generate future profitable operations and receive continued financial support from its creditors and shareholders. These financial statements do not give effect to any adjustments that might be required should the Company be unable to continue as a going concern. These adjustments could be material.

2. BASIS OF PRESENTATION

a) Statement of compliance

These interim financial statements, including comparatives, have been prepared in accordance with International Accounting Standard 34 - Interim Financial Reporting, using accounting policies consistent with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board. IFRS includes International Accounting Standards (“IAS”) and interpretations issued by the IFRS Interpretations Committee (“IFRIC”). As such, these interim financial statements do not contain all the disclosures required by IFRS for annual financial statements and should be read in conjunction with the Company's audited annual financial statements for the period ended August 31, 2025.

These financial statements were approved and authorized for issuance by the Company's Board of Directors on April 24, 2026.

Antimony Resources Corp.
(formerly Big Red Mining Corp.)

Notes to the Condensed Interim Financial Statements

For the six and three months ended February 28, 2026 and 2025

(Unaudited - Expressed in Canadian dollars – unless otherwise noted)

2. BASIS OF PRESENTATION

b) Basis of presentation

These condensed interim financial statements have been prepared on a historical cost basis, except for those financial instruments which have been classified and measured at fair value. In addition, with the exception of cash flow information, these condensed interim financial statements have been prepared using the accrual method of accounting.

c) Functional and presentation currency

All amounts in these condensed interim financial statements are presented in Canadian dollars, the functional currency of the Company. The accounting policies set out below have been applied consistently.

The Company considers the primary and secondary indicators as part of its decision-making process. The condensed interim financial statements are presented in Canadian dollars, which is also the functional currency of the Company.

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES

The accounting policies applied in the preparation of these financial statements are consistent with those applied and disclosed in notes 2 and 3 to the Company's audited annual financial statements for the year ended August 31, 2025.

The preparation of these financial statements in conformance with IFRS requires management to make estimates, judgments and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates. Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected.

Critical accounting estimates

Critical accounting estimates are estimates and assumptions made by management that may result in a material adjustment to the carrying amount of assets and liabilities within the next financial year and include, but are not limited to, the following:

Recovery of deferred tax assets

The Company estimates the expected manner and timing of the realization or settlement of the carrying value of its assets and liabilities and applies the tax rates that are enacted or substantively enacted on the estimated dates of realization or settlement.

Antimony Resources Corp.
(formerly Big Red Mining Corp.)

Notes to the Condensed Interim Financial Statements

For the six and three months ended February 28, 2026 and 2025

(Unaudited - Expressed in Canadian dollars – unless otherwise noted)

3. SUMMARY OF MATERIAL ACCOUNTING POLICIES (CONTINUED)

Environmental rehabilitation obligation

The Company recognizes statutory, contractual or other legal obligations related to the retirement of its exploration and evaluation assets and its tangible long-lived assets when such obligations are incurred, if a reasonable estimate of fair value can be made. These obligations are measured initially at fair value and the resulting costs are capitalized to the carrying value of the related asset. In subsequent periods, the liability is adjusted for any changes in the amount or timing and for the discounting of the underlying future cash flows. The capitalized asset retirement cost is amortized to operations over the life of the asset.

Fair-value of finders' warrants

The Company measures the cost of finders' warrants by reference to the fair value of the warrants at the date on which they are granted. Estimating the fair value of finder warrants requires applying the Black-Scholes valuation model to each grant based on the terms and conditions of such issuance.

Share-based compensation

The fair value of stock options issued are subject to the limitations of the Black-Scholes Option Pricing Model that incorporates market data and involves uncertainty in estimates used by management in the assumptions. Because the Black-Scholes Option Pricing Model requires the input of highly subjective assumptions, including the volatility of share prices, changes in subjective input assumptions can materially affect the fair value estimate.

Critical accounting judgements

Information about critical judgments in applying accounting policies that have the most significant effect on the amounts recognized in the financial statements include, but are not limited to, the following:

- the assessment of the Company's ability to continue as a going concern and whether there are events or conditions that may give rise to significant uncertainty; and
- the classification / allocation of expenditures as exploration and evaluation expenditures or operating expenses.

4. NEW ACCOUNTING STANDARDS AND RECENT PRONOUNCEMENTS

a) Recent accounting pronouncements

Certain other accounting pronouncements were issued but the Company anticipates that the application of these standards, amendments and interpretations in future periods will have no material impact on the results and financial position of the Company except for additional disclosures. The Company is assessing the impact of the new or revised IFRS standards on its financial position and financial performance.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

The Company provides disclosures that enable users to evaluate (a) the significance of financial instruments for the entity's financial position and performance; and (b) the nature and extent of risks arising from financial instruments to which the entity is exposed during the period and at the date of the statement of financial position, and how the entity manages these risks.

The Company provides information about its financial instruments measured at fair value at one of three levels according to the relative reliability of the inputs used to estimate the fair value:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices); and

Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The Company's financial instruments consist of cash and cash equivalents, interest receivable, and accounts payable. The carrying values of the Company's interest receivable and accounts payable approximate their respective fair values due to the short term maturity of these instruments.

February 28, 2026, the fair value of cash and cash equivalents held by the Company was based on level 1 inputs of the fair value hierarchy.

8. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (CONTINUED)

The Company's risk exposures and the impact on the Company's financial instruments are summarized below:

Credit risk

The Company's primary exposure to credit risk is its cash and cash equivalents of \$8,237,221 at February 28, 2026. With cash and cash equivalents on deposit with reputable financial institutions, it is management's opinion that the Company is not exposed to significant credit risks arising from the financial instruments.

Liquidity risk

Liquidity risk is the risk that the Company will be able to meet its financial obligations as they fall due. As at February 28, 2026, the Company had current liabilities totaling \$917,302 and cash and cash equivalents of \$8,237,221 and is not exposed to significant liquidity risk at this time. However, since the Company is in the exploration stage, it will periodically have to raise funds to continue operations and intends to raise further financing through private placements.

Market risk

Market risk is the risk that changes in market prices such as commodity prices, foreign exchange rates and interest rates will affect the Company's income. The objective of market risk management is to manage and control market risk exposure within acceptable parameters.

At February 28, 2026, the Company is exposed to foreign currency risk for its financial assets denominated in currencies other than the Canadian dollar as follows:

Cash	US\$4,568,530
-------------	----------------------

Based on the above net exposure as at February 28, 2026 and assuming all other variables remain constant, a 10% depreciation or appreciation of the Canadian dollar relative to the US dollar could result in a decrease/increase of approximately \$456,853 in the Company's comprehensive loss. During the February 28, 2026 period, the company did not hold any foreign cash.

The Company does not use derivative instruments to reduce its insignificant exposure to market risks.

9. CAPITAL MANAGEMENT

The Company includes shareholders' equity and any debt it may issue, in the definition of capital. The Company's objective when managing capital is to maintain its ability to continue as a going concern in order to provide returns for shareholders and benefits for other stakeholders.

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition and exploration of mineral properties. The Board of Directors does not establish quantitative return on capital criteria for management but rather relies on the expertise of the Company's management and consultants to sustain future development of the business.

9. CAPITAL MANAGEMENT (continued)

The Company's property is in the exploration stage and as such the Company is dependent upon external financings to fund activities. In order to carry out planned exploration and pay for administrative costs, the Company will spend its existing working capital and raise additional funds required.

Management reviews its capital management approach on an ongoing basis and believes that this approach is reasonable given the relative size of the Company. The Company is not subject to any external covenants.

10. SUBSEQUENT EVENTS

Subsequent to February 28, 2026 the Company issued 3,940,000 common shares. 3,190,000 shares were pursuant to the exercise of stock options and 750,000 shares were issued pursuant to the conversion of RSUs
